- ▲ Improves Pregnancy

KEY POINTS

1. More often than not when you follow our shopping list you save money. This can be used to pay for our products and even join the business! Opt 4- 120
2. On average we spend £5.00 on our lunch. Use the shakes for lunch 5 days per week and you will save £25.00 per week - £100 pounds per month. So as you can see you can afford the product range even more in combination with the shopping list and even start your own franchise and share JP with the people you know like and meet.
3. As a result of embarking on our program you will often find it is much easier to stop snacking and picking. Again you can use this money to purchase the juice Plus products - maybe our bars which you can keep in the car in case you go hungry.
4. Juice Plus cost between around £3.00 and £1.00 per day. This is less than a cup of coffee. So it's of value in any case.
5. Juice Plus helps attack illness and disease at a cell level. It reduces FREE RADICALS that are one of the main causes of illness and disease by 75% in just 7 days! Unbelievable for just a few pounds per day.
6. You purchase 4 months of JP and no more until you use it up. This is because 60% of your body's cells are brand new after 120 days. You are more likely to feel more of the above benefits the longer you are on our breakthrough in nutrition.
7. Children can have our product for FREE if an adult take's the product.

In short you are SAVING money whilst becoming healthy and flooding your body with nutrients with a product that is proven to be nutritious unlike the fruit and veg we consume from our supermarkets. Even better kids can have the product for FREE.
